

Louise POGU

Electronics Hardware Engineer

CONTACT:

-  **Phone:** +33 6 30 56 68 16
-  **LinkedIn:** www.linkedin.com/in/louise-pogu
-  **Email:** louise.pogu@gmail.com
-  **Driving Licence**
-  **GitHub:** github.com/Moussycat

SKILLS:

Soft skills

Rigorous / Receptive to Feedback / Analytical skills / Communicative / Curiosity / Technical and functional documentation / Cross-Functional Team Collaboration

Technical

- Electronics

Analog / Digital / Power Electronics / RF (Radio Frequency) / VHDL / Verilog / High and Low Voltage Systems / Power Converters / Embedded Systems / PCB Design / EMC Fundamentals / High-Frequency Design / RFID / MMIC / Multiphysics Systems / LoRa / STM32 / ESP32

- Computer Science / IT

Embedded C / Python / Linux / VBA / Assembly Language

- Software

Altium / LTSpice / Vivado / Arduino / ADS (Advanced Design System) / Canva / Git / Cadence Virtuoso AMS Designer / Ansys HFSS / KiCad / Microsoft Office Suite

- Languages

English: TOEIC score 825  (Professional working proficiency, B2)

French: Voltaire Certification score  729 (Native speaker)

- Management & Business

Project Management / Marketing / Environmental Impact / Agile Methodology / Cross-functional and Hierarchical Management

EDUCATION:

Western Graduate School of Electronics (ESEO) Angers, France)

2023-2025 |

Master's Degree in Electronics and Computer Engineering, specialization in Electronics and Connected Devices

- Electronics Hardware design, Radio Frequency, Microwave circuit, Patch antenna design, Embedded Systems and Communication Protocols

2020-2023 |

Bachelor's Degree in Computer and Electronic Engineering – Graduated with honors (Jury's Distinction)

- Electronics Hardware design, Power Electronics, Radio frequency, FPGA

WORK EXPERIENCE:

Radio Frequency Design Engineer - Final-Year Engineering Internship

Thales SIX, Cholet, France | February-August 2025

Designed an **RF receiver extension** for direction-finding applications, enhancing radar system performance (*Electronic Warfare*)

- Developed an **RF link budget simulator** (Excel/VBA)
- Created block diagrams, pre-implementation components (MMICs), and **optimized PCB routing** (KiCad) for high-frequency circuits
- Authored **technical and managerial documentation** for defense and security environments

Embedded Electronics Engineer - Technical Engineering Internship

Nimbus Centre, Cork, Ireland | July-November 2023

Designed and prototyped a **low-power IoT device** for coastal environmental monitoring

- Selected and assembled electronic components (ESP32, *accelerometer*, *temperature sensors*, *SD module*)
- Independently developed **embedded code** (Arduino)
- Created a **3D enclosure design** (SolidWorks)
- Wrote detailed **technical documentation**

Power Electronics Technician - Bachelor's Final Internship

Thales DMS, Brest, France | March-June 2023

Conducted **tests and diagnostics** on low- to high-voltage power converter boards using unautomated test benches

- Identified and documented **recurring failures** (Excel)
- Proposed and implemented **corrective solutions** for defense and security applications

R&D Engineer - Bachelor's Technical Internship TRONICO TAME-POWER, Saint-Philbert-de-Bouaine, France | May-July 2022

- **Simulated and analyzed losses** in a 4-switch non-inverting buck-boost converter
- Created an **Excel tool** to optimize duty cycles and efficiency (Excel)
- Authored **technical documentation**

INTERESTS:

Theatre (9 years), Violin (5 years), Drawing, Watercolour Painting, Baking, etc

International travel experience across Europe, Africa, and America. 

Communication & Cultural Exposure

Electronics DIY (Electricity monitoring project), School projects 

VOLUNTEER WORK & ENGAGEMENTS:

2023 - 2025

- Promoted women in STEM to middle and high school students

2022-2023

- Communications Officer, ESEO Curiosity Astronomy Association

2021-2022

- Vice President, ESE'OS (project management and equipment repair)
- Assisted in counting ballots during the first round of the French presidential elections
